

Mayur Antala

FRONTEND DEVELOPER

Web Developer with experience in building responsive, user-friendly websites using HTML, CSS, JavaScript, jQuery, and React.js. Skilled in developing dynamic web applications and working with modern CSS frameworks such as Bootstrap and Tailwind CSS. Possesses basic knowledge of UI/UX principles, wireframing, and Figma. Passionate about writing clean, efficient code, enhancing user experience, and continuously learning new technologies to expand expertise.

WORK EXPERIENCE

Senior Frontend Developer / Hyperlink Infosystem

JAN 2025 - PRESENT

- Led the development of complex, scalable frontend applications using React.js and modern JavaScript.
- Designed and implemented reusable UI components, improving development speed and code maintainability.
- Collaborated with product, design, and backend teams to deliver high-quality, user-centric interfaces.
- Optimized performance, reducing load times and improving overall application responsiveness.
- Mentored junior developers, conducted code reviews, and ensured adherence to best practices and standards.

Junior Frontend Developer / Hyperlink Infosystem

JAN 2024 - JAN 2025

- Developed responsive and scalable web pages using HTML, CSS, SCSS, and JavaScript.
- Built reusable UI components and dynamic features using React.js.
- Collaborated with designers to convert Figma wireframes into pixel-perfect interfaces.
- Integrated REST APIs and optimized user experience across devices.
- Improved code quality by following best practices and using Git Lab for version control.

Internship Frontend Developer / Hyperlink Infosystem

JULY 2023 - JAN 2024

- Designed responsive and visually appealing web pages using HTML, CSS, and Bootstrap
- Converted Figma and Photoshop designs into clean, pixel-perfect UI layouts.
- Assisted developers in creating reusable components and improving frontend workflows..

PROJECT SUMMARY

Axiatom

Simplify learning through our video courses

This project is an online learning platform designed to simplify education through high-quality video courses. It helps learners improve their skills and build a better future by providing access to carefully selected classes taught by experienced mentors. The platform focuses on user-friendly design, structured learning paths, and engaging content to support continuous skill development anytime, anywhere.

Iwant

Food Application Project

I designed a modern and user-friendly interface for a food desktop application, focusing on clean layouts, smooth navigation, and an engaging user experience. Using Figma, HTML, CSS, and React.js, I created responsive screens for the dashboard, menu, orders, and user profile. I applied strong UI/UX principles to simplify user flow and ensure consistency across all pages. I also collaborated closely with developers to convert design concepts into functional components, delivering a polished and professional final product.

Sourcenow

Service Platform – Multi-User Web Portal (Customer, Supplier, Admin & Account Manager)

This project involved designing and structuring a comprehensive multi-user service platform with dedicated portals for customers, suppliers, admins, and account managers. The system included rich features such as product listings, quote management, project workflow, chat, payments, and analytics. I contributed to creating clean UI layouts, intuitive navigation, and consistent design patterns across all panels. I ensured an organized, user-friendly interface aligned with the detailed scope and business requirements. The result was a scalable and visually cohesive platform supporting smooth user operations end-to-end.
